Back End Developer

Number of Posts: 2

Contract Type: Full-time, indefinite

Job description

EPG Financial Services Ltd Malta was founded in January 2015 and is a 100 % subsidiary of the Euro Payment Group GmbH in Frankfurt, Germany. We are currently looking for a Senior Backend Developer (m/f/d) to join our international team in Malta on a full-time basis. If you are a dedicated and an ambitious professional wishing to work in an environment that rewards competence, and strives to develop the best products, then we would like to hear from you.

Responsibilities:

- As a Senior Backend Developer (m/f/d), you will occasionally function-test and implement micro-services with the help of the team.
- Moreover, you have to implement the backend of the application, manage the database and prepare migration files.
- In addition, you will design and implement interfaces as well as unit testing.
- Another responsibility of this role will include keeping and maintaining a good quality-code and helping with automatization.
- Last but not least, you will also be expected to maintain comprehensive documentation (user guide, release log, etc.) and keep the agile principles in mind.

Requirements:

- Minimum five years' experience in C# programming language
- Familiar with .NET core 3.0 technologies and database technology (MSSQL)
- Good understanding of the best software development practices and patterns
- Basic understanding of the GIT version control system is a must
- Can drive results at all levels, regardless of reporting structures

Training provided
Yes

Any assistance with accommodation/relocation
Flight to Malta, two-week accommodation, administrative support

Any other benefits
Wellness allowance, health insurance, performance bonus, fruit, snacks, activities

Salary: €30,000 - €40,000

How will the interviews be held?

Kotlin/Java Developer

Number of Posts: 2

Contract Type: Permanent – Full Time

Job description
We are looking for an enthusiastic and motivated Backend Developer to join our platform team. You will have the opportunity to work on and build all parts of the platform: business logic, external APIs, admin APIs, integrations with game and payment providers, as well real-time integrations with other internal systems such as the data platform and middleware.

New development will all be using Kotlin, a modern, concise, safe language which is accessible to all developers, especially those with Java experience.

Responsibilities
- Work in an agile team consisting of other backend developers to build and maintain microservices in Spring Boot and Kotlin to handle platform business logic.
- Liaise with other tech teams and product team to provide functionality over REST APIs.
- Participate in task estimations, planning and code reviews.
- Integrate with third party systems to allow for a greater number of products on the platform.
- Gather knowledge in business requirements to be able to ease operations.
- Collaborate with engineers across the department to identify and build on improvements to our processes and systems.

Required Skills
- Advanced knowledge of Java (2/3 years of experience)
- SQL
- Spring Framework (1 year experience)
- Basic GIT knowledge is necessary
- Working in scrum team

Skills in the following area is considered a Plus
- Kotlin
- Redis
- Docker
- MongoDB
- AWS
- Kafka

Profile Skills
- Degree in Computer Science or related field.
- Good problem-solving skills.
- Excellent verbal communication skills and interpersonal skills.

- The ability to quickly learn new things and adapt
- A good eye for layout with attention to detail

Training provided: Yes, however candidate must possess the minimum requirements and training can be offered for additional skills

Any assistance with accommodation/relocation: We cover relocation costs and provide temporary accommodation.

- **Any other benefits:**
  Fantastic team
- Welcoming Environment
- Chance to grow
- Extremely competitive salary
- Health & Dental Insurance
- Wellness Benefits
- Fruit, snacks & drinks
- Friday beers
- Summer & Winter events

Salary
Eur 30,000 – 60,000 (depending on candidate's experience)

How will the interviews be held?
All interview stages are done remotely over Google Meet links.

To apply
CVs and a covering email are to be sent by email to **eures.recruitment.jobsplus@gov.mt** and should be written in English. Please quote the vacancy name and number in your email.

Manual QA

Number of Posts: 1

Contract Type: Permanent – Full Time

Job description

We're looking for a motivated Manual QA to join our ranks. The lucky candidate in this role will assist our QA lead and help test our API's, client facing SPAs, as well as our tooling applications.

You'll be part of team working towards common goals, so it's important that you have a keen eye for detail, but more importantly, we want you to grow your skills with us. We work hard to produce excellent results, but we also like to enjoy ourselves too, so it's a great environment to be a part of.

Responsibilities:
- Work in an agile team consisting of frontend developers and other QAs to ensure that a quality product is delivered.
- Designing and developing test specifications based on product functionalities and requirements.
- Collaborating with the product and developers in test teams to improve test quality.

Requirements
- knowledge of the different testing methodologies
- Solid knowledge of testing at a frontend level (cross browser/viewport/cross platform)
- Ability to give suggestions aimed at improving quality and flag any possible degradation to the quality of the product
- Ability to help design and execution of testcases based on requirements from our PO
- Able to work closely with the development team
- Knowledge of testing procedures and detailed report writing.
- Good knowledge of agile project management
- Self-motivated individual always looking to better his skills.
- Excellent analytical and trouble shooting skills.
- Attention to detail.
- Good problem-solving skills.
- Excellent verbal communication skills and interpersonal skills.
- The ability to quickly learn new things and adapt
  Skills in the following area is considered a Plus:
  - Testing at an API level
  - ISTQB certification
  - Experience with Test Management tools

Training

Training is provided; however candidate must possess the minimum requirements and training can be offered for additional skills.

Any assistance with accommodation/relocation:
We cover relocation costs and provide temporary accommodation.

Any other benefits:
- Work on exciting products from the ground up
- Commuting Assistance
- Performance Bonus
- Wellness Package
- Health and Dental Insurance
- Work From home Allowance
- Welcoming Environment
- Chance to grow.
- Fruit, snacks & drinks
- Friday beers
- Summer & Winter events

Salary
Eur 15,000-35,000 (depending on candidate's experience)
